My Gear. Some of you may be wondering what kind of gear do I use. Well it's no secret. I try to use the most reliable stuff around, that is brands that have excellent warranty, materials that are state-of-the-art, or things that will last a long time. Besides this, I want something that will do more than just one thing. That way, when I'm in the field, I don't have to carry as much and cut down on the weight.
